Leak Detection Checklist - 7 Early Signs to Catch Before Costly Damage

Use this checklist to spot early warning signs of a hidden water leak in your property. If you notice more than two of these signs, consider booking a professional leak detection survey to avoid costly damage.

- Boiler losing pressure with no visible leaks
- Water meter spinning when nothing is in use
- Damp patches on walls, floors, or ceilings
- Peeling paint, warped flooring, or soft spots
- Musty odours or visible mould
- Unusually high water bills
- Sound of running water inside walls or floors
